

# Wallet Guide

How to use MetaMask to swap your tokens

---

## Important Information

In order to swap your old token with the new token you will have to use MetaMask.

The Token Swap-Engine supports MetaMask.

### Get and Install MetaMask

Please download MetaMask here:

[Download](#)

### Step 1: How to set up a wallet

**Welcome to MetaMask**

Connecting you to Ethereum and the Decentralized Web.  
We're happy to see you.

[Get Started](#)

Click 

- Click on the button **"Get Started"**.

NEW TO METAMASK?

No, I already have a seed phrase

Import your existing wallet using a 12 word seed phrase

Import Wallet

Yes, let's get set up!

This will create a new wallet and seed phrase

## Help Us Improve MetaMask

MetaMask would like to gather usage data to better understand how our users interact with the extension. This data will be used to continually improve the usability and user experience of our product and the Ethereum ecosystem.

MetaMask will..

- ✓ Always allow you to opt-out via Settings
- ✓ Send anonymized click & pageview events
- ✓ Maintain a public aggregate dashboard to educate the community
- ✗ **Never** collect keys, addresses, transactions, balances, hashes, or any personal information
- ✗ **Never** collect your full IP address
- ✗ **Never** sell data for profit. Ever!

No Thanks

I agree

This data is aggregated and is therefore anonymous for the purposes of General Data Protection Regulation (EU) 2016/679. For more information in relation to our privacy practices, please see our [Privacy Policy here](#).

- If you have the seed phrase (12 English words) of the wallet that holds tokens, please select **"Import Wallet"**. If you want to import one or more private keys, please follow the instructions below to firstly create a new wallet. Please click on the button **"Create a Wallet"**.
- Please click on the page **"Help Us Improve MetaMask"** on the button **"No Thanks"**.

## Create Password

New Password (min 8 chars)

Confirm Password

I have read and agree to the [Terms of Use](#)

Create

- Please think of a password for your **MetaMask** account and confirm it.
- Accept the "**Terms of Use**" and press the "**Create**" button.

## Secret Backup Phrase

Your secret backup phrase makes it easy to back up and restore your account.

**WARNING:** Never disclose your backup phrase. Anyone with this phrase can take your Ether forever.

[Remind me later](#)

[Next](#)

Tips:

Store this phrase in a password manager like 1Password.

Write this phrase on a piece of paper and store in a secure location. If you want even more security, write it down on multiple pieces of paper and store each in 2 - 3 different locations.

Memorize this phrase.

[Download this Secret Backup Phrase and keep it stored safely on an external encrypted hard drive or storage medium.](#)

- Please click on the grey field with the lock symbol.
- Write down the displayed passphrase yourself or save it on your computer by clicking on the blue download link on the right. **The passphrase is important and you will need it later again.**
- Press the "**NEXT**" button.
- Now, you have to enter the passphrase and confirm it.

## Congratulations

You passed the test - keep your seedphrase safe, it's your responsibility!

**Tips on storing it safely**

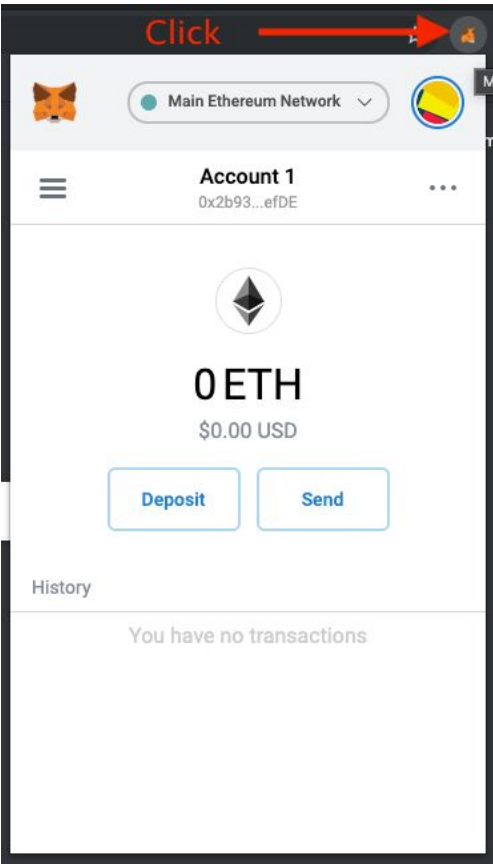

- Save a backup in multiple places.
- Never share the phrase with anyone.
- Be careful of phishing! MetaMask will never spontaneously ask for your seed phrase.
- If you need to back up your seed phrase again, you can find it in Settings -> Security.
- If you ever have questions or see something fishy, email [support@metamask.io](mailto:support@metamask.io).

\*MetaMask cannot recover your seedphrase. [Learn more.](#)

All Done

- Congratulations, you have set up your wallet!

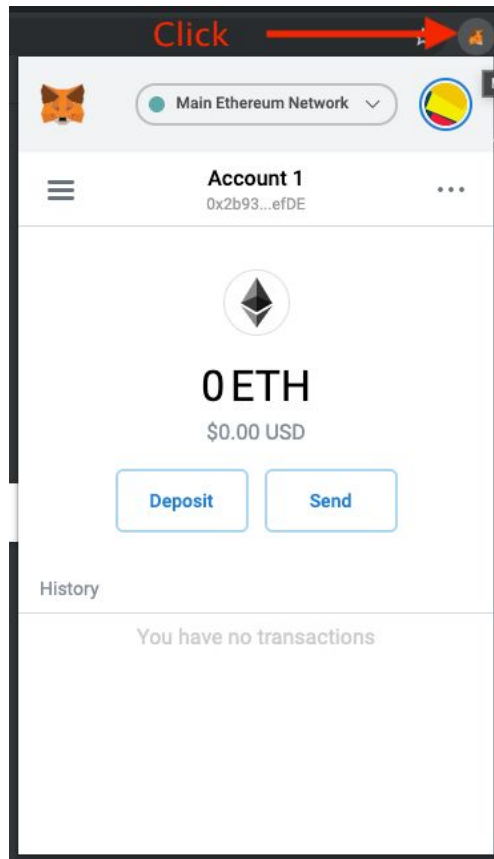

## Step 2: How to import private keys

- At the top right of your browser you will see the **MetaMask** icon. Please click on the **MetaMask** icon to open **MetaMask**.
- You are now in the **Ethereum Main Network**.

**Info:**  
**You have the same address on all networks.**

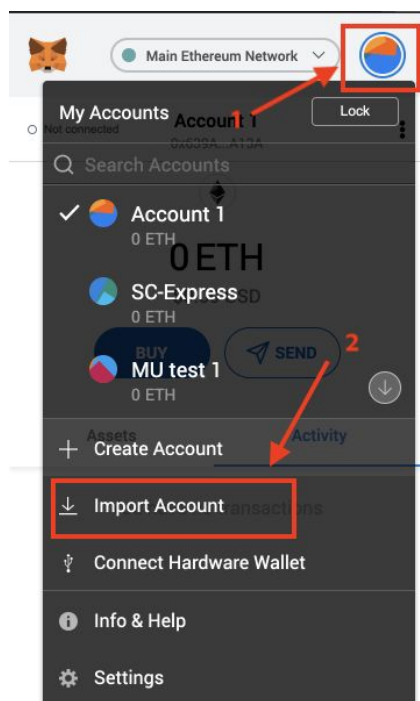

### Step 3: How to set up MetaMask

- At the top right of your browser you will see the **MetaMask** icon. Please click on the **MetaMask** icon to open **MetaMask**.
- You are now in the **Ethereum Main Network**.

**Info:**  
You have the same address on all networks.

### Step 4: Import/connect a wallet

- To import or connect to your wallet, please select the **"Import Account"**.

Main Ethereum Network ▾

Create **Import** Hardware

Imported accounts will not be associated with your originally created MetaMask account seedphrase.  
Learn more about imported accounts [here](#)

Select Type Private Key ▾

Paste your private key string here:

Cancel Import

- Enter your private key and click on **"Import"**

Main Ethereum Network ▾

Create Import **Hardware**

Connect a hardware wallet

Select a hardware wallet you'd like to use with MetaMask

 Ledger

 TREZOR

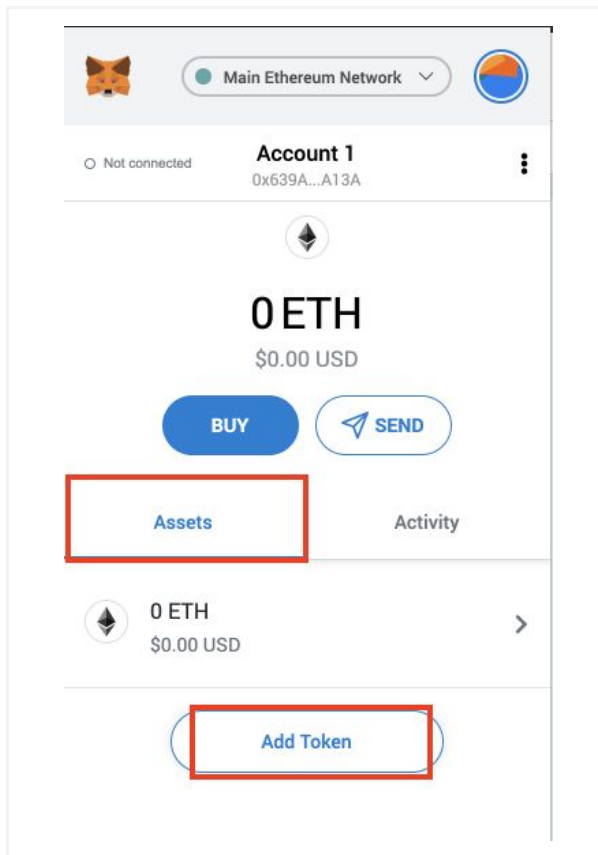

Connect

Don't have a hardware wallet?  
Order a [Trezor](#) or [Ledger](#) and keep your funds in cold storage

▽

- Or select "Hardware" and follow the instructions to connect to your hardware wallet.

## Step 5: Check token balance

- To check your token balance, you need to specify the token address.
- Click on the **Assets** tab and the **"Add Token"** button.

- Now click on **"Custom Token"** to add STONt token.
- You only need the **"Token Contract Address"** which we will insert in the next step.
- The token symbol and the decimal places are read automatically.
- Copy the address below into the field **"Token Contract Address"**.
- **Contract-Adresse:**  
0x660E78E77B0a4eeF978eF198C7229259f0Eff8ac (STON Token v1 on mainnet)
- Please press **"Next"** and **"Add Tokens"** on the next screen.
- That's it. Now you've added the STON token. If you have already some tokens in your wallet, they will be visible under your **"Assets"** tab.

## Step 6: Connect MetaMask to a web application

The first screenshot shows the 'Connect With MetaMask' interface. At the top, it displays a profile icon with the letter 'T' and the URL 'https://swap.mainston.com'. Below this, the title 'Connect With MetaMask' is followed by the instruction 'Select account(s)'. A list of accounts is shown, each with a checkbox, a circular icon, and the account name and balance. The first account, 'Account 1 (...a13a)' with '0 ETH', is selected. Below the list, there is a warning: 'Only connect with sites you trust. [Learn more](#)'. At the bottom, there are 'Cancel' and 'Next' buttons.

The second screenshot shows the 'Connect to Account 1 (...a13a)' confirmation screen. It has a 'Back' button at the top left and '2 of 2' at the top right. The profile icon and URL are the same. The title 'Connect to Account 1 (...a13a)' is followed by 'Allow this site to:'. A checkbox is checked next to the text 'View the addresses of your permitted accounts (required)'. The same warning and 'Cancel'/'Connect' buttons are at the bottom.

- When connecting to a web application that supports connection to crypto wallets, MetaMask will pop up an interface that asks for permission to connect to the said application. If you don't see the pop up, click on the **MetaMask** icon at the top right of your browser.
- Select your account and press **"Next"**.
- Confirm the action by clicking **"Connect"**.
- Now your wallet is connected to the web application.
